Highest Quality Standards

Novir's InstaCLEAR virtual drug testing program is designed to meet the highest regulatory standards, ensuring compliance with FDA guidelines. Each testing device undergoes a rigorous third-party validation process to verify accuracy, reliability, and consistency in detecting substances. The laboratories we partner with for oral fluid screening and confirmation are CAP (College of American Pathologists) accredited and CLIA (Clinical Laboratory Improvement Amendment) certified, ensuring the highest standards of laboratory testing and quality control.

We utilize our own CLIA certified laboratory for product validation testing purposes and maintain an internationally recognized ISO13485 quality management system, reinforcing our commitment to precision, reliability, and regulatory excellence.
